

ATOMIC PHYSICS 3

Proceedings of the Third International Conference on
Atomic Physics, August 7-11, 1972, Boulder, Colorado

Editors

STEPHEN J. SMITH

Joint Institute for Laboratory Astrophysics
Chairman, Organizing Committee

and

G. K. WALTERS

Rice University
Chairman, Program Committee

with technical assistance by

Lorraine H. Volsky

Joint Institute for Laboratory Astrophysics

PLENUM PRESS • NEW YORK-LONDON • 1973

CONTENTS

Session A (*N. Ramsey, Chairman*)

Status of QED Experiments	1
V. W. Hughes	
Status of Quantum Electrodynamics Theory.	33
N. M. Kroll	
Atomic Physics and Quantum Electrodynamics in the Infinite Momentum Frame	61
S. J. Brodsky	
Theories of the Fine Structure Constant α	73
S. L. Adler	
$g_J^{(H)}/g_S^{(e)}$ Determination: Preliminary Results	85
J. S. Tiedeman and H. G. Robinson	

Session B (*P. Jacquinet, Chairman*)

Exotic Atoms.	93
C. S. Wu	
Highly Excited States of Helium and Neon.	119
W. H. Wing, K. R. Lea and W. E. Lamb, Jr.	
Theoretical Study of Atomic Rydberg States.	143
R. T. Poe and T. N. Chang	
Inner-Shell Ionization by Heavy Charged Particles	155
W. Brandt	
Fine Structure and Hyperfine Structure of the Helium Negative Ion.	169
D. L. Mader and R. Novick	
Statistical Theory of Atom and Ion Polarizabilities	181
V. V. Pustovalov, V. P. Shevelko and A. V. Vinogradov	

Session C (W. Paul, Chairman)

Ab Initio Calculations of Atomic Energy Spectra	185
A. P. Jucys	
Bound States and Continuum States of Atomic Systems	205
M. J. Seaton	
Recent Advances in the Interpretation of Complex Atomic Spectra.	221
Z. B. Goldschmidt	
Model Potential Calculations for Two-Valence Electron Systems	247
C. Laughlin and G. A. Victor	
Complex Rotations in Atomic Scattering Theory	257
G. Doolen, M. Hidalgo, J. Nuttall and R. Stagat	
Photodetachment of Li^- and Na^-	261
D. W. Norcross and D. L. Moores	

Session D (H. Ehrhardt, Chairman)

Radiative Decay of the Metastable States of the H and He Sequences - Theory	269
G. W. F. Drake	
Radiative Decay of the Metastable States of the H and He Sequences - Experiment	291
R. Marrus	
Ionization of Excited Atomic Particles by Electric Fields.	309
R. N. Il'in	
Metastable States of Highly Excited Heavy Ions.	327
D. J. Pegg, P. M. Griffin, I. A. Sellin, W. W. Smith and B. Donnally	
Differential Cross Sections for Metastable He and Ar.	339
H. Haberland, C. H. Chen and Y. T. Lee

Session E (R. Garstang, Chairman)

Interstellar Molecules	353
K. B. Jefferts	
Inner-Shell Ionizations in the Interstellar Medium	363
J. C. Weisheit	
Atomic Physics in the Upper Atmosphere	377
E. E. Ferguson	
Rotational Excitation by Resonant Transfer of Electronic Excitation	393
M. R. Flannery	

Session F (F. Strumia, Chairman)

Electronic Polarization Behavior in Collisions	401
B. Bederson	
Beam Resonance Measurements of Atomic Quadrupole Moments.	429
P. G. H. Sandars and A. J. Stewart	
Recent Advances in Helium Optical Pumping.	435
J. Brossel	
The Temperature Dependence of the Electron-Rubidium Spin-Exchange Cross Section	463
S. J. Davis and L. C. Balling	
Orientation of Short-Lived Mercury Isotopes by Means of Optical Pumping Detected by β and γ Radiation	471
J. Bonn, G. Huber, H. -J. Kluge, U. Köpf, L. Kugler, E. -W. Otten and J. Rodriguez	
Excited Atomic and Molecular States in Liquid Helium	477
W. A. Fitzsimmons	

Session G (H. Dehmelt, Chairman)

Electron Spectroscopy for Chemical Analysis	493
K. Siegbahn	
Polarized Electron Sources.	523
J. Kessler	
Photoelectric Measurements of Doublet Intensity Ratios in Cesium	543
G. F. Fulop and H. H. Stroke	
Study of e-O ₂ and e-H ₂ Scattering by Electron Time-of-Flight Spectroscopy	553
J. E. Land and W. Raith	
Progress with Positron Beams for Atomic Collisions.	561
W. C. Keever, B. Jaduszliwer and D. A. L. Paul	
Spin Polarization in Proton-Xenon Charge Exchange Collisions	573
J. Macek and R. Shakeshaft	

Session H (A. Schawlow, Chairman)

Spectroscopy with Tunable Lasers.	579
T. W. Hänsch	
Saturated Absorption Spectroscopy with Applications to the 3.39 μ m Methane Transition.	615
J. L. Hall	
Recent Advances in the Spectroscopy of Small Molecules.	647
W. Demtröder	
Atomic g-Factors of Hydrogen-Like F ¹⁹	657
R. Brenn, H. Calvin, H. Metcalf, G. Sprouse and L. Young	
Modulation of Mercury Resonance Fluorescence under Pulsed Electric Fields: Measurement of Differential Stark Shifts.	663
W. J. Sandle, M. C. Standage and D. M. Warrington	
SUBJECT INDEX	671
