

# ATOMIC PHYSICS 9

---

**Editors:**

**Robert S. Van Dyck, Jr.**

Conference Co-Chairman

**and**

**E. Norval Fortson**

Conference Chairman

University of Washington  
Seattle, Washington

**World Scientific**

## CONTENTS

In Memory of Alfred Kastler .....	1
<i>B. Cagnac</i>	
Spectroscopy of Stored Atomic Ions .....	3
<i>D. J. Wineland, W. M. Itano, J. C. Bergquist, J. J. Bollinger, and J. D. Prestage</i>	
High Resolution Microwave Spectroscopy on Trapped Atomic Ions .....	28
<i>G. Werth</i>	
New Developments in QED .....	38
<i>T. Kinoshita and J. Sapirstein</i>	
The Electron and Positron Geonium Experiments .....	53
<i>R. S. Van Dyck, Jr., P. B. Schwinberg, and H. G. Dehmelt</i>	
Measurement of the Lamb Shift in Muonium: The TRIUMF Experiment .....	75
<i>C. J. Oram</i>	
The Lamb Shift in Muonium .....	83
<i>A. Badertscher, V. W. Hughes, D. C. Lu, M. W. Ritter, K. A. Woodle, M. Gladisch, H. Orth, G. zu Putlitz, M. Eckhause, J. Kane, and F. G. Mariam</i>	
Some Surprises in Muon-Catalyzed Fusion .....	99
<i>S. E. Jones</i>	
Physics with $p\bar{p}$ Atoms at LEAR .....	118
<i>U. Gastaldi</i>	
Collision Studies with Trapped Ions .....	137
<i>D. A. Church</i>	
Small Atomic Clusters .....	153
<i>E. Recknagel</i>	
Atomic Beam Spectroscopies of Solid Surfaces .....	167
<i>K. H. Rieder</i>	
Atomic Hydrogen at Sub-Kelvin Temperatures .....	187
<i>J. T. M. Walraven</i>	
Implications of Elementary Particle Theory for Experiments in Atomic P and T Violation .....	212
<i>B. W. Lynn</i>	
The Atomic Theory of P and T Violation .....	225
<i>P. G. H. Sandars</i>	
Atomic Parity Violation Experiments .....	246
<i>M. A. Bouchiat and L. Pottier</i>	

Search for a Permanent Electric Dipole Moment on Atoms and Molecules . . . . .	272
<i>F. J. Raab</i>	
Search for a Neutron Electric Dipole Moment . . . . .	285
<i>B. Heckel</i>	
Double Resonance and Optical Pumping: The Early Days . . . . .	292
<i>G. W. Series</i>	
Studies of Molecular Interaction by Laser Excitation (SMILE) . . . . .	313
<i>F. Engelke</i>	
Laser-Cooled Atomic Beams . . . . .	338
<i>W. D. Phillips, J. V. Prodan, and H. Metcalf</i>	
Decay of the Vacuum in Heavy Ion Collisions . . . . .	362
<i>S. Schramm, U. Heinz, U. Müller, J. Reinhardt, Th. de Reus, G. Soff, W. Greiner, and B. Müller</i>	
Review of Short Wavelength Lasers . . . . .	382
<i>P. L. Hagelstein</i>	
Electron Spectrometry Experiments with the Use of Synchrotron Radiation . . . . .	414
<i>M. O. Krause</i>	
Free-Electron Lasers . . . . .	432
<i>K. E. Robinson</i>	
Metastability in the XUV: Lasers and Spectroscopy . . . . .	462
<i>S. E. Harris, R. G. Caro, R. W. Falcone, D. E. Holmgren, J. E. Rothenberg, D. J. Walker, J. C. Wang, J. R. Willison, and J. F. Young</i>	
Algebraic Quantization of Strong Electron Correlations . . . . .	480
<i>D. R. Herrick</i>	
High Excitation of Two Electrons . . . . .	491
<i>A. R. P. Rau</i>	
Dielectronic Recombination . . . . .	505
<i>G. H. Dunn, D. S. Belić, N. Djurić, and D. W. Mueller</i>	
Multiphoton Processes at High Laser Intensities . . . . .	523
<i>M. Gavrila</i>	
Subject Index . . . . .	549
